

# High Performance Metal Analyser – ARTUS 8

The ARTUS 8 provides fast, precise and accurate analyses for the perfect melt. It is our most powerful and reliable spectrometer and is well suited for the metal processing industry and perfectly suited for the metal production and inspection & contract lab industries. It is available in 3 models: the ARTUS 8 Standard, ARTUS 8 Ultimate and ARTUS 8 Visible. The ARTUS 8 Standard covers a wavelength range of 174-680 nm; ARTUS 8 Ultimate: 146-680 nm and ARTUS 8 Visible: 212-680 nm. All types of calibration elements are covered.

**Quality Control and Assurance are essential to making your business successful. The ARTUS 8 is the ideal companion for incoming material, in-process testing and final quality inspection.**

Risks such as material mix-ups and machinery damage are reduced, thanks to

- adapters which detect and analyse oddly shaped samples and small pieces and
- the optimisable grade library which visually displays non-compliance alloy specifications.
